SUPPLEMENTAL INFORMATION NEEDED FOR DREDGE PROJECTS

Provide the following information for the maintenance dredge activities proposed:

- a. Contact information for the dredging contractor representative(s) including name(s), telephone numbers (24 hours/7 days per week) and physical address(es) to be contacted in the event of an emergency (i.e. conveyance pipeline leak, navigation hazard(s), upland property issues, or other construction related issues).
- b. The method of dredging to be used including details such as equipment size, amount to be dredged, hours of operation, method of transport, material transfer methods, transportation and access routes, upland disposal area location, dimensions of spoil disposal berms, disposal methods, erosion control methods, final disposal location or disposal contractor information. This information must be reflected in associated plan drawings.
- c. Specify if any of the following dredging activities or combinations of activities will be used at this site: aeration tanks or basins, air strippers, wet scrubbers, incinerators, caustics or masking agents, or any other control procedures or technologies.
- d. If any self-contained temporary upland storage area(s) are to be utilized, please supply detailed site, plan and profile drawings containing associated information.
- e. Submit authorization letter(s) from the upland property owner(s) of any temporary upland dredge spoil storage site to be utilized for this project allowing use of their property.
- f. For any permanent off-site disposal site, provide this agency with signed authorization form(s) to allow the area to be utilized as well as the State permit authorizing the site to be used as a disposal area.
